

FIELD COMPOST

High Quality Products Made in East Anglia

Field No.3 Peat Free Multipurpose Potting Compost

Product Specification

Field No. 3 Peat Free Multipurpose potting compost

Description

A premium quality, peat free multipurpose potting compost suitable for seeding, potting and containers.

- **Field No.3** a tried and tested multipurpose growing media used by amateur and professional growers across the UK.
- **Field No.3** contains a natural supply of slow release nutrients resulting in stronger and healthier root development.
- **Field No.3** added fertiliser sufficient for the early establishment of new plants.
- **Field No.3** excellent water holding and re-wetting properties.

Directions for use

For Seed Sowing

Fill a seed tray or plant pot with Field 3, level and gently firm down below the rim of the container.

Sow seeds according to suppliers recommendations.

Water gently and keep moist and warm within a purpose built propagator or under a sheet of clear glass/polythene.

Keep warm and shaded until germination takes place, then remove covering and place in warm sun lit area, avoiding direct sun light.

Water and feed as necessary following seed suppliers instructions.

For Re-potting

Make sure the plant has been well watered and left to drain before re-potting.

Choose a pot at least 4cm larger than the existing one.

Fill the new container up just below the level of the existing plant root ball, then carefully place the plant on top leaving about 1 cm below the rim.

Fill and gently firm the void space around the root ball with Field 3, then feed and water according to the plants requirement.

Watering

Remember to keep Field 3 moist at all times - do not let it dry out and equally do not overwater!

See overleaf for Typical physico-chemical properties and nutrient content
