Field No.11 Pot Mulch Product Specification

Field No. 11 Pine Pot Mulch

Description

A premium quality finely graded pine bark that can be used either as ornamental bark mulch or on top of plant pots to suppress weed, moss and liverwort growth.

Product Benefits

- **Field No.11** Attractive, high quality ornamental mulch for use on plant pots and densely planted borders.
- **Field No.11** Suppresses the growth of moss, weeds and liverworts that may inhibit plant growth.
- **Field No.11** Very free draining and holds moisture in the soil reducing the need for irrigation.
- Field No.11Adds an insulating layer to the planted area resisting climatic extremes of freezing/drought conditions.

How much do I need?

- 1. Measure the approximate surface area of the bed or border you wish to mulch.
- Decide how deep you wish to install the mulch. For best results on pots 10-15mm is recommended whereas on borders 25mm – 75mm is recommended.
- 3. 1m³ of this product will be sufficient to cover the following surface area:

Depth of mulch:	25mm	50mm	75mm
Area covered:	40m²	20m²	13.33m²

Alternatively, we have a handy volume calculator on the Field Compost Ltd website or give us a call with the dimensions of the area you wish to mulch, and we will do the calculations for you.

See overleaf for typical physico-chemical properties and nutrient content

Directions for use as mulch

- 1. Clear weeds from the area ahead of planting, thorough hand weeding is particularly effective.
- 2. Prepare and cultivate the root zone. The addition of Field No. 1 Organic Soil Improver, Field No. 12 Nutrimulch or Field No. 25 Maximulch is recommended at this stage.
- To further reduce maintenance requirements and to increase mulch life a geo-textile mat can be laid ahead of planting.
- 4. Plant area.
- 5. Spread Field No.11 evenly at a depth of between 25 and 75mm (1 to 3 inches) allowing at least 10% for settlement.
- 6. For best results reduce disturbance of mulch once installed.
- 7. For best results top up levels every 6-12 months.

Technical Information

Product constituent	100% Pine Bark
Origin	British
Particle Size Range (Nominal)	3-15mm
White wood content	<3%
Fines content	<3%
рН	4.5 – 5.5
Bulk Density	290 – 315kg/m3
FSC Certified	Yes
